

Selection of an Architect

The School Board shall have the authority to select the architect for any construction requiring these services. The School Board will consider the financial position of the school district, the ability of the architect to meet the specifications of the School Board and the State Department of Education if necessary, and the experience of the architect. The School Board may also consider the hiring of a Construction Manager or any other factors it deems relevant.

It shall be the responsibility of the superintendent and the School Board members on the Facilities Committee to interview the architects and make a recommendation to the School Board.
