

Educational Specifications for Buildings and Sites

Buildings and sites considered for purchase or construction by the School Board or currently owned by the school district and used for the educational program must meet, or upon improvement be able to meet, the specifications set by the School Board. The School Board will make this determination.

Prior to remodeling or other construction of buildings and sites, the School Board may appoint a committee of consultants, employees, citizens, or others to assist the School Board in developing the specifications for the new or improved buildings and sites. These specifications will be consistent with the education program, and they will provide the architect with the information necessary to determine what is expected from the facility. It is within the discretion of the School Board to determine whether a committee is appointed.

The educational specifications will include, but not be limited to, the financial resources available for the project, the definition and character of classrooms, the functional use to be made of the rooms, description of specialized needs, and other pertinent information as the School Board deems necessary.

It shall be the responsibility of the superintendent to make a recommendation to the School Board regarding the specifications of buildings and sites.
